SUMMARY

Final-year Bachelor of Financial Technology (Honours) student at UCSI University with two finance internships: AML screening, KYC verification and loan documentation at Funding Societies, and credit control at Airswift. Screened 300+ prospective borrowers on World-Check and escalated document discrepancies found during KYC reviews. Built a Python and AI budgeting app for Gen Z as my final year project. Seeking a credit, finance or payments operations internship at a bank or fintech.

EDUCATION

UCSI University, Bachelor of Financial Technology (Honours) | CGPA 3.19 — Sep 2022 - May 2027 (expected graduation)

- **Relevant courses:** Introductory Accounting, Financial Modelling, Data Analytics for Finance, Electronic Payment Systems and Security, Corporate Finance, Programming for Fintech
- **Final year project:** Gen Z budgeting and spending tracker built in Python with rule-based spending analysis and recommendations
- **Data Analytics:** Analysed and predicted rent price factors among houses in Indian cities

Sunway College, Monash University Foundation Year (MUFY) | 76.13% — Jul 2021 - Jun 2022

EXPERIENCE

Funding Societies | *Operations Intern* — Sep 2024 - Dec 2024

- Completed 300+ AML screenings of prospective borrowers on World-Check (LSEG) over 4 months, by running daily criminal-background checks as part of the credit process.
- Flagged 20+ discrepancies in borrower KYC documents via Onfido from about 10 files reviewed weekly for 2 months, by cross-checking each upload against the application and escalating errors to my line manager for deeper checks.
- Prepared about 300 loan and legal documents (around 25 a week for 3 months) from pre-built templates, by verifying applicant details on CTOS and reconciling the borrowing amount against supporting documents.
- Resolved 30+ cases with missing information that the SOP did not cover, by asking the relevant teams and applying patterns from earlier files
- Reviewed 200+ issuers' loan drawdown applications against eligibility requirements and supporting documents before processing, supporting microfinancing, invoice financing and reverse factoring operations.
- Drafted and processed 200+ payment instruction letters to the Trustee and portal transactions, monitoring each to completion with 1% errors.

Airswift | *Credit & Finance Intern* — Sep 2023 - Nov 2023

- Produced receivables aging reports for 5 Airswift entities (China, Indonesia, Australia, Korea, Malaysia) two days a week, by consolidating invoice, timesheet, receipt and amendment data.
- Processed 90+ client and contractor invoices in Microsoft D365 and keyed invoice data into Ariba, by matching each to its timesheet and receipts
- Compiled billing information for 30+ billing runs to clients including MISC, ExxonMobil and Technip, by reconciling invoices, expenses and amended charges.
- Extracted payables and collected versus uncollected receivables in Power BI for credit and finance team presentations.
- Updated around 50+ contractor records (payslips, expenses, timesheets) in D365 to match approved amendments.

PROJECTS

Gen Z Budgeting and Spending Tracker | Final Year Project

- Built a personal finance tracker and budgeting app for Gen Z users in Python, with rule-based learning and spending and budgeting analysis and a recommendation and review feature as its core module. It includes item wishlists funding and tracking feature as well as badge system, rewarding users for consistent use and smart finance habits and flag overspending.
- Designed the recommendation and review feature, which gives each user several personalized budget suggestions based on their own spending history, by comparing actual spend against category budgets.
- Tested with 5 students over 4 weeks, and 3 said it helped them track spending, as well as earning B+ grade by lecturers, though praised for adding innovative features for better retention.
- Implemented effective AI prompt engineering via Claude to provide assistance in enhancing the user experience of the app

Python Libraries: *Tkinter, SQLite3, bcrypt, pandas, matplotlib, and python-dateutil.*

Database/storage: *A local SQLite database and optional CSV exports.*

Github Repository: *https://github.com/Foundnationz/finance-tracker.git*

Monthly House Rent Predictive Analysis | Data Analytics

- Built a rent prediction model for 6 Indian cities, reaching an R^2 of 0.83 on log-rent for unseen test data, by cleaning 4,746 listings and training a leakage-safe scikit-learn pipeline.
- Selected the final model by comparing Ridge, Lasso, ElasticNet and polynomial regression with 5-fold cross-validation, finding that the simpler linear model performed as well.
- Identified the main rent drivers from the model coefficients (Mumbai about 181% above Bangalore, unfurnished about 29% below furnished).

Libraries: *pandas, numpy, matplotlib, seaborn, sckit-learn, google.colab*

Models: *LinearRegression, Ridge, Lasso, ElasticNet, PolynomialFeatures*

Github Repository: *https://github.com/Foundnationz/house-rent-prediction.git*

SKILLS

Compliance and operations: AML screening (World-Check), KYC verification, CTOS checks, due diligence, loan documentation, SOP adherence

Finance: receivables aging, credit control, invoice processing, transaction reconciliation, financial accounting (foundation level)

Tools: Excel (SPE UCSI Excel Workshop 2.0) (Udemy), Microsoft D365, Ariba (all used in internships); Python (final year project); Google Workspace, AI prompt engineering (Claude & Chat-GPT), Microsoft Office

Languages: English (full proficiency), Malay, Mandarin (limited)

ORGNISATION, LEADERSHIP AND TRAINING

Committee member, *Youth Financial Literacy Club | UCSI University* — Jan 2026 - May 2026

- Handled registration for an online investment event with 30+ participants, by collecting and checking each participant's details for accuracy.
- Facilitated a corporate visit to Affin Bank for 20+ students and wrote a MC script.

Logistics member, *H.O.T. Night 9.0, House of Talents Club| UCSI University* — May 2025 - Oct 2025

- Negotiated ballroom booking pricing with the Le Quadri Hotel sales director and coordinated venue, equipment and backstage logistics for around 10 performers and 200+ attendees.

CERTIFICATIONS AND TRAINING

- **SPE UCSI SC Excel Workshop 2.0** — Jun 2023
- **FinTech Wave Malaysia seminar (Finology)** — Feb 2024
